PROFESSIONAL SUMMARY

Mobile engineer with 4+ years shipping production apps in native Android (Kotlin, Jetpack Compose) and React Native (TypeScript, Expo). Currently the sole mobile engineer on TaskedIn (10K+ downloads, 4.6-star rating on Google Play).

TECHNICAL SKILLS

- **Android:** Kotlin • Java • Jetpack Compose • Coroutines & Flow • Hilt/Dagger • Koin • Room • Retrofit • REST APIs • Type-safe Navigation
- **React Native:** JavaScript • TypeScript • React (Hooks) • Expo (expo-router, config plugins, EAS Build/Submit) • New Architecture • Zustand • TanStack Query • Zod
- **Architecture:** Clean Architecture • MVVM/MVI • Modularization • Design Systems
- **Integrations:** WebRTC • SignalR • Firebase • AWS S3 • Mada payments • Sunmi POS • Arabic RTL & localization (i18n)
- **Performance & Release:** Baseline Profiles • R8 • Macrobenchmark • Crashlytics • Google Play Console • Gradle • Git

PROFESSIONAL EXPERIENCE

Mega Trust Group – Mobile Engineer (Android & React Native) | Aug 2023 – Present

- Sole mobile engineer on TaskedIn for the past year; 20+ releases since 2023.
- Building the React Native + Expo (New Architecture) rewrite solo to bring TaskedIn to iOS, including a custom Expo config plugin for a native video SDK.
- Migrating a 90+ module Android codebase from XML to Jetpack Compose (151 of ~180 screens done), with type-safe navigation and a shared design system.
- Cut cold start ~30% (Baseline Profiles, R8), verified with Macrobenchmark.
- Own WebRTC-based video meetings and screen sharing; rebuilt chat on SignalR.

Sanad Pay – Android Developer (Contract) | Remote | Jul 2025 – Dec 2025

- Built the Sanad Business Mada payments app from scratch as the sole Android developer, alongside my full-time role; used by ~300 merchants in Saudi Arabia.
- Added Sunmi POS receipt printing, with offline receipts during network drops.
- Handled payment failures and timeouts so cashiers always see a clear outcome.

Rahtuk – Android Developer | Remote | Aug 2022 – Nov 2022

- Built a Saudi home-services app from scratch as the sole developer (Java), including UI and core flows across 8+ service categories.

PROJECTS

Meta Sight (graduation project, team lead): vision assistant for visually impaired users: OCR, object, currency, and face recognition (Java, ML Kit, TensorFlow Lite).

EDUCATION

Bachelor's in Management Information Systems (MIS)

Delta University for Science and Technology | Egypt • 2018 – 2022

LANGUAGES

Arabic (native) • English (professional proficiency)
